FRESH BAKED JOY @ INPUT BAKERY

Sides
Filled, panorama or mirror

Dampers
The damped automatic mechanism with oiled-charged shock absorbers ensures the flaps close slowly for easy refilling the comfortable shopping

Cooling rack
Setting up a cooling device at one level allows additional product positioning and cross sales.

Hot plate
easy setting on any level of the system to keep baked goods fresh and warm

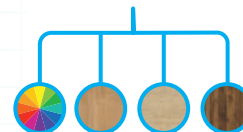

Consistency
the minimal distance between modules results in a highly compact system

Bread and pastry cabinets
A wide selection of patterns, wood decor or metal colours for all modules with a full range of trays and accessories

Modular, flexible solution
The possibility of adapting the modules to meet the customers' requirements

SMART BAKERY

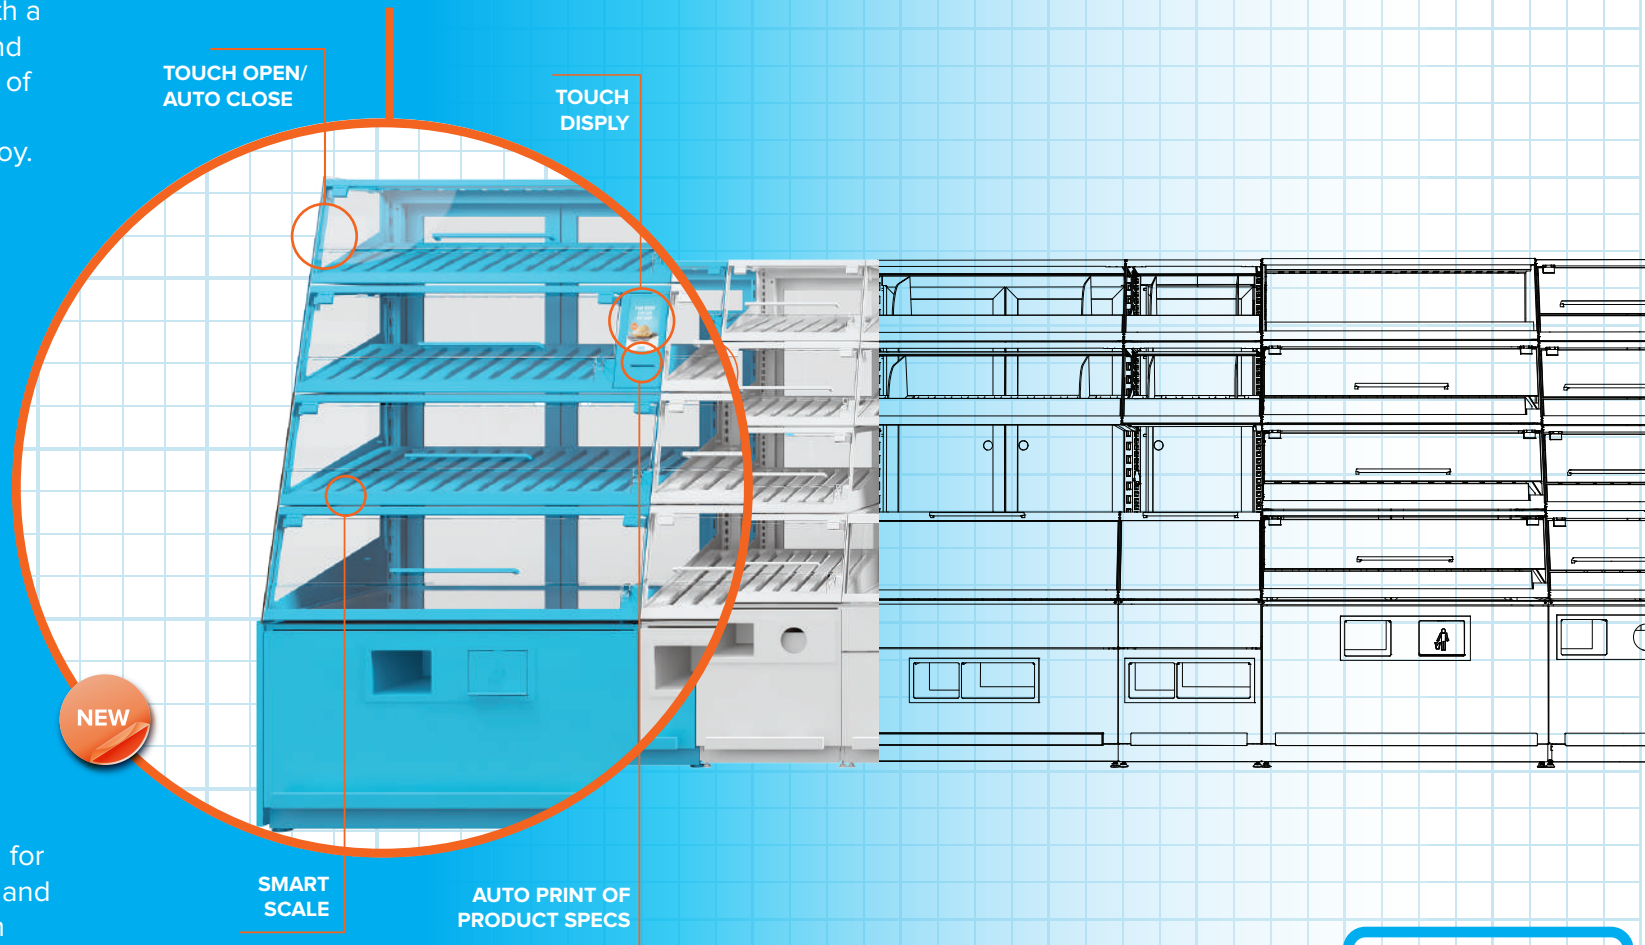

WE KNOW

When we started developing our bakery system, we had universal qualities of bread on our minds. We were thinking about a freshly baked loaf of bread with a crunchy texture, unforgettable taste and a scent that brings back the memories of a neighbourhood bakery around the corner, about feelings of security and joy.

We took the industry insight very seriously: when it comes to bread and pastries, a well-designed, effective display and the scent count more than anywhere else in the store.

Input bakery system is developed to meet the needs of consumers in a fast-paced world looking for convenient options for food and grocery purchases, maintaining the pleasure of great aesthetics and emotions that go along. Built in a modular principle, it offers complete flexibility, simple handling and optimal cost-effectiveness.

Each module provides maximum transparency and product presentation for all kinds of bread and baked products, and heating plates keep baked goods fresh and warm. Easy reloading, cleaning and maintenance are secured for your and your customers' ultimate satisfaction.
