

INPUT.

RETAIL. WAREHOUSE. SOLUTIONS.

OUR STORY.

Our story began in 2010: a young, enthusiastic team with the goal of securing a place in retail shops and a warehouse fitting business.

Fully committed to our mission, we worked hard and gathered experience. We did our best to choose the best suppliers and most reliable partners. With them and our clients, we entered the world where we are firmly positioned and recognised.

Today, we are exactly where we wanted to be: surrounded by great partners and satisfied customers.

The network we created is growing and adapting to the demands of clients, industries, and the times we live in.

Our team consists of professionals with expertise in every aspect of furnishing retail establishments and warehouse spaces. Together, they cover the entire process, customising it for each partner.

WINNING MISSION

OUR
SUCCESS

IS THE SUCCESS OF
OUR
CLIENTS

VISION

Input as clients' first choice for comprehensive solutions and support in projecting and fitting retail and warehouse spaces in the country and region. We are setting the highest standards in the industry with an innovative spirit, flexibility and respecting deadlines that make our client's success our own.

MISSION

We are a reliable partner for long-term cooperation. We engage top performance, knowledge and experience for every project. We nurture the client's brand and credibility first, then his retail and warehouse space. We cultivate innovation, cooperation and trust. We follow the spirit of the times and the needs of our partners; we care for the environment and the community.

— WE KNOW

SCRAPEL

What do we consider success?

► A long-term collaboration with our clients. When we work together, we grow and learn from each other.

Our business concept?

► A comprehensive portfolio of products and services covering the entire process of fitting business premises, retail and warehouses.

Our area of expertise?

► Planning, design, equipment assembly, customer service and supervision.

What does our portfolio consist of?

► A comprehensive offer of neutral trade and warehouse equipment: shelf systems, entrance systems, cash registers, consumer baskets and trolleys, storage racks, lightning, smart retail equipment and other supporting equipment.

THE ESSENCE

OF OUR

JOB

The essential insight: for the result to be superb, every project phase must be flawless.

When we start working together, we will listen to your needs, wishes and ideas for fitting your retail. We will examine the possibilities and begin planning, and our designers will analyse your facility and create blueprints and drafts.

Our imperative: maximum engagement of the space

The initial proposal we deliver will consider your wishes, functionality, visual effect and the latest trends.

Every site is a unique challenge

Together, we will get the result we aim for: we will listen to your comments and requests for modifications and create the final solution. Each space has its characteristics and atmosphere. With respect for your brand, visual identity and specific

requirements, we will create a tailor-made solution just for you. Besides, we will personalise and adapt to your needs all the products you will use to fit your space.

Our area of expertise: warehouse and storage spaces.

From complex solutions of functional logistic centres to smaller warehouses – each of our projects will consider every inch of your storage space. Your logistic process will become economical and fully optimised, making your business simple and functional.

Our architects and designers will put their expertise and experience at your disposal for every part of the process we will go through.

We will provide reasonable, economical, and functional solutions for top-notch aesthetics.

IDEAS COMING TO LIFE

COMING TO LIFE

Throughout the entire process, from the initial idea to the production – we will see that your brand, service, visual identity and logistic solutions tell a unique story – **Your story**. Naturally, they all do so in a way the clients can understand.

Technologies go hand in hand with product development and adapting the approach to every client's specific requests. While we do that, we

always keep deadlines in mind, social responsibility and aspects of a healthy environment for us, our clients and the entire community.

With our logistic support consisting of 360 degrees services and products for retail fitting, we will manage every project within the deadline, with no dilemma.

WORKING TODAY THINKING OF TOMORROW

Equipment assembly is a process we plan to the tiniest details, so your space can get its final look. In this process, the assembly team is in charge – well-trained experts who don't know about unpredicted situations. With them, using state-of-the-art tools

and security criteria, the assembly process is running smoothly and by the plan.

Our service team is available for all interventions and consultations, ready to react quickly.

SPACE

OUR EXPERTISE

Every object we are entrusted with carries the sign of our support and reliability, wrapped in aesthetics, visual identity and style that every one of our clients deserves. We know how valuable respect for deadlines is for your business, so we prioritise them. Fitting your premises for your measure, we are fully committed to maintaining the industry

standards in every process segment, delivering secure, functional, modern and high-quality objects. We pride ourselves on being the creators of many retail interiors and warehouse spaces in our country and the whole region, spreading the network of partners within which collaboration is founded on trust and mutual respect.
